HERO PRODUCT

NATA DE COCO

Nata De Coco is a product made of fresh coconut water through the fermentation process of *Acetobacter Xylinum* bacteria. The product contains a lot of fiber which provides energy, helps cool the body, reduces stress and fatigue.

"It is sweet and chewy dessert cubes, perfect for cocktails and other sweet refreshments"

CHOLESTEROL-FREE < FIBROUS < LIGHT < JUICY

A SYMPHONY OF TROPICAL FLAVOR AND TEXTURE

From the fresh and delicious coconuts of the land of Ben Tre - known as the 'Coconut Kingdom' of Southern Vietnam, we take pride in bringing our customers this premium dessert that combines natural flavor and texture of fresh coconut. Experience the juicy and refreshing taste of Nata de coco as we take you on an enjoyable journey of crispy and chewiness

QUALITY ASSURANCE

The raw Nata de coco are carefully selected from Ben Tre - a region with a warm climate and fertile land that produces the freshest coconuts.

Our products are certified by reputable organizations such as HACCP, ISO 22000.

With our experienced team of experts and strict quality control processes, we ensure that each product meets customer expectations.

KEY FEATURES

NATURAL AND REFRESHING

Experience the freshness and juiciness encapsulated in every bite

EXQUISITE TEXTURE

Our Nata De Coco has a crispy texture and the perfect level of chewiness, delivering a delightful and enticing chewing experience.

ETHICAL & SUSTAINABLE

At our factory, sustainable production practices are mandatory and closely managed. We prioritize environmental friendliness, ensuring the preservation of natural resources.

VERSATILE USAGE

Nata de coco is a popular dessert and snack enjoyed by people of all ages.

It can be enjoyed a refreshing dessert or paired with various culinary creations such as: a delightful topping for beverages, adds a touch of sweetness to desserts, or serves as a delectable accompaniment to fruits.

READ MORE

1

(1a)

The raw materials must undergo a comprehensive inspection of sensory, chemical, physical, and microbiological parameters to ensure quality upon arrival, storage, and production.

(1b)

Soak the raw material in clean water for 30 minutes to remove initial impurities. Keep going processing with water, then adding NaOH to adjust the pH. The processing procedure takes approximately 4 hours to ensure whiteness, impurity control, particle size, and pH level.

2

(2a)

Pour clean water into the cooking tank. Add sugar, acidity regulators, and fruit flavors. Cook the nata de coco at the specified temperature and time.

(2b)

Fill the mixture into packaging according to the requirements: Cups: 90g or 190g; Pouches: 400g, 900g, or 2kg.

(2c)

Seal the mouth of the cup or pouch tightly.

(2d)

The product is sterilized at 75-78°C.

3

(3a)

Packaging the product. Check the specifications and expiration date.

(3b)

Packing in carton boxes

(3c)

Store and maintain at the standard temperature.

(3d)
